

OLADAYO AJIBOLA

FRONTEND DEVELOPER

PROFESSIONAL SUMMARY

Innovative, task-driven individual with over 3 years of experience building responsive websites using the MERN stack across diverse industries. Proficient in developing static and dynamic webpages, creating user interfaces, writing, and testing codes, and implementing new features based on users' feedbacks.

PERSONAL PROJECTS

• Developers Forum

MongoDB, Express, React, Node

This project was built solely with the MERN stack. It allows a user to register and login an account, update biodata which include developer's experience and education history. Moreso, a user can create, delete, like, unlike, and comment on a post. Responsive across all media screens

• Crappo Website

React, Tailwind CSS

This is a sophisticated webpage for a cryptocurrency app. It is responsive and equipped with sophisticated animations and other exquisite functionalities.

• E-Commerce Landing Page

React, Tailwind CSS

This is a landing page equipped with a modifiable shopping cart, order increment/decrement buttons, coupled with a lightbox display of item's different views. Responsive across all media screens.
